

*Hello dear friends! Thank you for choosing my software. I really hope you enjoy my programs. My name is Vladimir and I have been trading for over 15 years. This file will help you figure out how to install the program, find the best broker or a cheap VPS server. I will be greatly appreciated any feedback about my programs.*

**Promised nice bonus!** 

<https://trading-go.ru/>

Did you purchase the program in the Mql5.com market? Now you can request free access to all my programs located on <https://trading-go.ru/> for a period of 90 days. Fill out the simple form <https://crm.trading-go.ru/zayavka> and enter the purchase payment ID in the "Coupon" field. The purchase ID will be available in your personal account on the Mql5.com website in the "Payments" section. Within 90 days you can use all my programs on real and demo accounts.

The screenshot shows the MQL5 user interface for Vladimir Pastushak. The left sidebar contains a menu with items like 'Профиль', 'Настройки', 'Сообщения', 'Достижения', 'Избранное', 'Платежи' (highlighted with a red box), 'Сервисдеск', 'Фриланс', 'Агенты', 'Покупки', 'Продавец', 'Графики', 'Публикации', 'Все сообщения', and 'Блог'. The main area displays a table of transactions with columns 'Дата' and 'Номер'. The transaction with date '2021.01.11' and number '8008820' is highlighted with a red box. A red arrow points from this box to a modal form titled 'Запрос активации реального торгового счета'. The form includes fields for 'Имя\*', 'Почта\*', 'Счет\*', 'Брокер\*' (set to 'Alpari'), 'Терминал\*' (set to 'MT 4'), and 'Узнали из' (set to 'Не указано'). The 'Купон' field contains 'Не обязателен' and is also highlighted with a red box. At the bottom of the form is a red 'Отправить' button. Below the button, there is a disclaimer: 'Нажимая кнопку «Отправить», Вы соглашаетесь с Условиеми Бесплатного доступа, Политикой конфиденциальности, Предупреждением о рисках'.

## Recommended brokers ▲

For the successful operation of the program, I recommend choosing one of our [partner brokers](#). I have been in the trading for over 15 years. During this time, I have studied and tested the work of Expert Advisors of many brokers. Several partner brokers have been selected for stable and reliable operation. They were the ones that gave me the best results.

## Recommended VPS Server

**Virtual Private Server (VPS)** is a virtual operating environment with pre-installed or changing parameters configured to create a secure trading environment for currency speculation. The Metatrader terminals running on a rented VPS are protected from power cuts, internet disconnection, hacker attacks and virus infections, just like the trader's account.

We managed to become resellers of a large VPS hosting, thanks to this we can provide VPS servers on behalf of Trading-Go at the lowest price. We also recorded a large and detailed video instruction "[What is a VPS, how to order it, how to set it up on a computer and how to set it up on a smartphone](#)".

Video instruction (Russian)

## System requirements

System requirements for using MetaTrader 4 and 5 terminals:

- operating system: Windows 7, 9, 10 – 32/64 bit, Windows 11 – only 64 bit;
- RAM – 4 GB or more;
- a storage device or hard drive SSD or HDD with a storage capacity of at least 20 GB.

***For reliable operation of the MetaTrader 4 and 5 terminals, Windows 7, 9, 10, 11 64 bit is recommended, since support for 32-bit systems has been discontinued.***

If your MetaTrader 5 terminal is version 2361, you are recommended to update your terminal to a version greater than 3000, because Expert Advisors, indicators and scripts currently made or updated will not work on your terminal.

## Where to get set files

You can request set files in our Telegram group <https://t.me/tradinggoea>. All of them are for information only and can be used as a starting point for selecting your own settings.

**Important to know:** set files do not store information about spread, commissions, financial instruments, prices, swaps, etc. All our set files are selected manually and with the help of an optimizer for the trading servers of [our partners](#).

## How to install an Expert Advisor

The instruction is regularly updated. You can read the current instruction version [on Trading-Go](#).

## How to test an Expert Advisor

The instruction is regularly updated. You can read the current instruction version [on Trading-Go](#).

## How to optimize

The instruction is regularly updated. You can read the current instruction version [on Trading-Go](#).

## FAQ

### What is activation in the Mql5.com Market?

**Activation** is the ability to install the program on several computers or change the operating system several times. There are 30 activations for our programs. Each and every time you install the program on a new computer or on a new operating system, one activation will be written off.

### What is activation from Trading-Go?

**Activation** from Trading-Go is a license that converts the program from a demo version to a fully functioning version. When you first run any program from <https://trading-go.ru/> on a real account, the program itself automatically requests a licence from the trading-go activation server. The trading-go server automatically allocates a license for a period of 30 calendar days for all programs and stores this license in the MetaTrader terminal. The trader does not need to do anything in this case. Additionally, the following message will appear on the chart: "Test period – 30 days". At the end of the test period, the program will offer to purchase the program copy in the Mql5 Market or renew the license by making free access. **Activation and license are not required for strategy tester and demo accounts.**

The version from trading-go is easily distinguished from the version from the Mql5 Market:

- the versions from trading-go have RU and EN endings in program names, for example: VR Smart Grid **EN**.ex5;
- the versions from the Mql5 Market do not have endings in program names, for example: VR Smart Grid.ex5.

Terms of free access [https://trading-go.ru/why\\_is\\_it\\_free/](https://trading-go.ru/why_is_it_free/).

Application form for license renewal or activation for free use <https://crm.trading-go.ru/zayavka>.

### Where can I get the older program version?

We do not support older program versions. It is impossible to get the older program version.

### I cannot install Expert Advisor on VPS from ZOMRO

You cannot install a product from the market on VPS from ZOMRO, since access to the servers is restricted by the developers of the MetaTrader terminal, MetaQuotes. We recommend to use [Trading-Go](#) servers – their configuration is selected to use MetaTrader terminals.

## Our other products

You can get familiar with the full list of programs for MetaTrader terminals on the following websites: <https://trading-go.ru/> and <https://trading-go.net/>.
